

SMART™

Static standing frame

MD Class I Medical Device

**This is a medical device.
Use it in accordance with the user manual or the label.**

Description

Standing frame **SMART™** combines the advantages of low weight, ease of use, robust design and stability. Due to its simplicity, the therapy and work become much more comfortable for the caregiver and family. Available in 8 sizes for both children and adults.

SMART™ gives the user a sense of safety and great freedom of movement within the upper limbs. The device has a very positive impact on his development as well as makes it easier to overcome the results from injury or mobility limitations.

The standing frame uses an innovative system **UPRIGHT PRO™** – consisting of chest and pelvic braces with a very wide range of adjustment that enables to adopt the proper position.

The device is equipped with four swivel casters with brakes that allow to move the user within a flat.

Indications

- Cerebral palsy – various types and forms.
- Brain and spinal cord injuries with lower limbs paralysis and weakness, balance and motor coordination disorders with different etiology.
- Demyelinating disease (e.g. multiple sclerosis – SM).
